Summer Courses

1. For teachers of:

Agriculture,	Household Science.
Art.	Kindergarten-Primary
Auxiliary Classes.	Manual Training.
Commercial Subjects.	Physical Culture.
Farm Mechanics.	Vocal Music.
French.	Science.

2. For teachers who wish to complete their academic standing for First and Second Class certificates.

3. For teachers who wish to qualify for High School Assistants' Certificates.

The Summer Courses are conducted by the Department of Education for the benefit of teachers who desire to spend a part of their Summer vacation in an effort to improve their academic and professional standing and thus to become more efficient in carrying on with a modernized curriculum.

No fees are charged those who attend these courses, but the provisions formerly made for assisting teachers with an allowance for living and travelling expenses have been discontinued, except in the cases of those who served overseas during the war, to whom one dollar per day is allowed. That the teachers fully appreciate this golden opportunity is shown by the great increase in attendance from year to year. In 1928 the registered attendance was 3100.

The examination at the conclusion of the course is optional. Candidates who are successful in passing the examinations will be granted a certificate of standing. This year the course will be held in the city of Quebec from July 22nd to August 16th. It is hoped that arrangements similar to those of last year may be made for board and lodging in the Sillery Academy for the lady teachers who attend. Suitable arrangements will also be made for the male teachers in attendance. This is a very interesting and profitable course for teachers of French.

The High School and Continuation School Inspectors state that improvement in the teaching of French in the secondary schools is apparent in all cases where teachers have taken the Summer Course in Oral French, and that the value of this course to the teachers and schools cannot be over-estimated.

E. REFRESHER COURSES IN SCIENCE (July 10th to Aug. 6th.)

Refresher courses have been arranged for teachers of Science in the Secondary Schools of the Province. It is thought desirable that the teachers should have this opportunity of becoming better acquainted with the more recent advances in the study of the Science subjects on the school programme and of familiarizing themselves with the most effective methods of teaching these subjects. The Courses will be given at Toronto University and the Ontario College of Education from July 10th to August 6th. The courses given at the University will deal with the more recently discovered facts and the newer theories and methods in Physics and Chemistry, more particularly in their relation to the prescribed Courses for the Secondary Schools, and will be of benefit not only to those with a limited training in the Science subjects, but also to those with specialist standing; while the courses given at the Ontario College of Education will deal with Middle and Upper School Physics and Lower School Botany and Zoology, and are intended to give instruction in practical methods of teaching these subjects in the schools.

There will be a course in Physics from 9 to 12 o'clock each forenoon, and in Chemistry from 2 to 4 o'clock each afternoon at the University. At the Ontario College of Education there will be a course in Lower School Biology each forenoon and a course in Physics each afternoon. All courses will consist of lectures and experimental work.
